The construction of wooden houses raised on stilts, which help to escape floods and pests, is a phenomenon found across Southeast Asia. Over many centuries, Southeast Asian vernacular architecture. Using a prefabricated system, such houses could be taken down and rebuilt in new locations in an era when land was still abundant. Breaking away from the superficiality of the ubiquitous 'style book', *The Thai House* not only traces the history of these versatile buildings but also explains the stages in their construction, the beliefs that underlie the positioning of every architectural element and the complex ceremonies celebrating their construction. Beautiful photographs and authoritative texts celebrate all types of Thai houses.
