Abstract

The main thrust of this review is the perceived central position of professional focus to the effectiveness of any category of teacher in Nigeria. According to literature, indicators like instructional delivery, students' assessment, learning environment, teachers' personal quality, motivation, and subject-content- knowledge among others were used to measure teachers' effectiveness. Distraction, professional development, interpersonal relationship and punctuality were seen as essential components of professional focus that determines teachers' effectiveness. Recommendations suggested were based upon these components of professional focus.

Keywords: professional focus, professional development, interpersonal relationship, teacher effectiveness, punctuality.

INTRODUCTION

Darling-Hammond (2010) defined an effective teacher as one who is intellectually challenging, motivating students, setting high standards and encourages self-initiating learning. Anderson (2004) viewed an effective teacher as those teachers who achieved the goals set for them or goals set for them by others like the Ministry of Education.

Effective teachers are very important for students learning. However, teachers' effectiveness is difficult to define since there has not been a consensus agreement on what measured quality teacher (Stronge, Ward and Grant, 2011). However, it is possible to measure some teachers' attribute like interaction with student, teaching strategy, motivation, pedagogical content knowledge and classroom management through qualitative research approach. These teachers' attributes could act in a long way to determine teachers' effectiveness. Stronge, Ward and Grant (2011) identified four dimensions that were used to characterize an effective teacher as follows:

- Instructional effectiveness
- Uses of assessment for student learning
- Positive learning environment and
- Personal quality of the teacher
