

# Proceedings Of The 15th Asian Test Symposium: 20-23 November 2006, Fukuoka, Japan

docId:300132217

13. The Office currently has a comprehensive legal framework governing disciplinary measures which respects the rights of the defendant and which is considered to accord to best practice in international organisations. It offers a guarantee of the principles of due process, fairness and proportionality.
  14. While it is noted that the ILOAT has not, in the last ten years, overturned any decision taken following the disciplinary procedure conducted under the legal framework of the Office (reference may be made to the recent judgments in Nos. 3297 and 3430, both affirming decisions to dismiss), it was found that the structure, clarity, and perception of the regulations could be further improved.
  15. In focus group discussions, staff and managers identified a number of alleged unclearities and perception issues concerning the current framework for disciplinary procedures which are addressed through the current proposal.
  16. In order to address any purported deficiencies, the Office convened a working group, again including six representatives of the Central Staff Committee as well as union representatives, with the aim of revising those points in the existing disciplinary framework that could improve the perception and conduct of the proceedings.
  17. After consideration of various models for disciplinary proceedings, the drafting group arrived at the current proposal, which introduces a sound reform largely aligning the current provisions with the EU model while further improving upon the structure and clarity of the rules.
  18. The draft proposal was also discussed at the meeting of the Presidium of the Administrative Council (B28) on 26 April 2017. After inclusion of amendments proposed by the B28 delegations, the document in its present form is supported by the B28.
- C. REVIEW OF THE INTERNAL APPEALS SYSTEM**
19. In 2012, the Administrative Council adopted a reform of the EPO's internal appeals system, which was in part driven by a 133% increase of the number of internal appeals registered during the period 2004-2010 (CA/D 8/12). The reform was based on the introduction of a compulsory pre-litigation step (the so-called management review) allowing the Office to review its decision, the introduction of efficiency measures and empowerment of the Appeals Committee.
